Hi there,

My name is Ash from Twilio Support, and I hope your day is going well.

We sincerely apologize for the delay in our response. Due to an unexpected spike in support requests, our response times are currently longer than usual. Please rest assured that our team is working diligently to address all inquiries as quickly as possible.

I'm sorry to hear you are having issues updating your 2FA. I understand login issues can be frustrating.

To reset your number for you on our end, we can help with that. To authorize the request, please verify the billing information associated with the account:

Upgraded Pay-as-you-Go Account:

- Last four digits of the card on file
- Card type (Visa, Mastercard, AMEX, etc)
- The name of the credit card holder
- Amount and Date of last charge from Twilio
- or a copy of the last payment receipt or recharge notice from Twilio

Alternatively,

- If you use PayPal instead, please provide the email address associated with that account
- If you are invoiced and pay via ACH, please provide the last invoice received on the account

Please let me know if you have any questions.

Kindly,

Ash, Twilio Support

**Nelson Soh**

Dear Maria,

First, I sincerely apologize for the delayed responses to your recent emails. I want to be transparent with you: I've been overwhelmed by a series of cascading issues that have completely blocked my progress, and I'm reaching out now because I truly need your help to find a way forward.

Let me explain everything clearly.

Our Account Information:

- Twilio Account SID: ACb557b8186f09ccce3e6e5ed5948fe06c
 - Company: NORTON GAUSS BONZINI SARL (Bonzinilabs)
 - WhatsApp Business Account ID: 806816532042016
 - Website: bonzinilabs.com
-

Problem 1 — I Cannot Access My Twilio Account

I am currently **locked out of my Twilio account**. When I try to log in with my email and password, Twilio sends a verification code via SMS — but **the code never arrives**. I have also tried the phone call option, but that doesn't work either. I have attempted this multiple times over several days.

This is why I have been unable to respond to your emails or provide the information you requested. I simply cannot access the dashboard.

I need: Your help to either reset my 2FA method, send the code to my email instead, or temporarily disable SMS verification so I can regain access to my account.

Problem 2 — Facebook Account Disabled

During the WhatsApp onboarding process, I created a second Facebook account specifically for my business. **Facebook disabled this account** after their automated video verification failed (the camera showed a black screen during the check). I filed an appeal, but I have not received any response.

I'm unsure which Facebook account is currently linked to our WhatsApp Business Account (806816532042016) — it could be this disabled one, which would explain why the setup is stuck.

Problem 3 — Facebook Advertising Access Restricted

On my original Facebook account, I now receive the error: **"Votre accès aux publicités est restreint"** (Your advertising access is restricted). This prevents me from creating a Meta Business Portfolio, which is required to complete the WhatsApp Business setup.

This restriction is likely a consequence of the second account being disabled — Facebook may have flagged both accounts.

Problem 4 — Phone Number

You previously identified that **+237 652 236 856** is already registered on WhatsApp. That is my personal number — I do **not** want to migrate it, as I would lose all my personal WhatsApp data.

I would like to **purchase a new Twilio virtual number** dedicated to our WhatsApp Business API instead.

Why This Matters

I am a young entrepreneur running a fintech platform that helps African importers pay Chinese suppliers. My clients depend on this service. Right now:

- My clients are frustrated because they don't receive notifications about their transactions
- My business is losing money every day this remains unresolved
- I have been stuck on **Step 2 of the WhatsApp setup** for weeks

I have put significant effort into solving each issue as it appeared, but every time I fix one thing, another problem blocks me. I am honestly exhausted and demoralized, and I don't know how to move forward without your help.

What I Need From Twilio:

1. **Account access** — Please help me regain access to my Twilio account (SMS verification codes are not arriving)
2. **Facebook/Meta escalation** — Since Twilio has a direct partnership with Meta, could you escalate the advertising restriction on my account so I can complete the Business Portfolio setup?
3. **New phone number** — Guide me on purchasing a Twilio virtual number for WhatsApp (to replace the +237 personal number)
4. **WhatsApp onboarding** — Once the above are resolved, help me complete Step 2 and finish the sender approval

I am available at any time and will respond immediately to any email. I truly appreciate your patience and any help you can provide.

Thank you, Maria.

Best regards, **Nelson Soh** — NORTON GAUSS BONZINI SARL bonzinilabs.comcontact@bonzinilabs.com
